

The Bavarian American Academy promotes and coordinates the interdisciplinary cooperation of scholars in the social and cultural sciences in the broadest sense, specializing in aspects of North American culture, society, politics and economics in their hemispheric and global contexts.

The conference is organized by the Bavarian American Academy in cooperation with the Bavarian State Ministry of Education and Cultural Affairs, Sciences and the Arts and the University of Erlangen-Nuremberg.

17th International Academy Conference 2017

The Comeback of Populism Transatlantic Perspectives

The term populism is fuzzy and diffuse. It neither identifies a political program nor does it clearly situate political parties in a left-to-right spectrum. Rather, it appears to refer to a particular style of political performance and communication. Analyzing the current resurgence of populism in the United States and Europe, this conference seeks to shed light on some of the implications of populism's comeback from a transatlantic and interdisciplinary point of view.

The conference will evaluate the return of populism in a diachronic and a synchronic perspective.

Resurgent populism in Europe and the United States needs to be interpreted and understood both in its cultural and political specificities and in its virulent reappearance in the United States, France, Germany, etc. as well as its concomitant global reach in the present moment.

Contemporary populisms often share an authoritarian as well as an anti-elitist and anti-establishment agenda that posits as capturing and expressing the 'voice of the people.' Scenarios of threat and anxiety meet a rhetoric of emancipation from suffering and victimization, yet at the same time, populist protest appears to be couched in a militant rhetoric of exclusion and, usually, nativism.

Working through populism's simplifications and mystifications, our conference will examine its discursive strategies in nuanced ways.
